ABOUT ME

Software Engineer with 5+ years of hands-on experience designing and scaling web applications across B2B SaaS, E-commerce, and FinTech domains. Specialized in the end-to-end TypeScript ecosystem, bridging high-performance React/Next.js frontends with robust Nest.js/Node.js microservices and MongoDB backends. Proven track record architecting multi-tenant platforms, high-concurrency event registration engines, and resilient CI/CD automated test pipelines.

TECHNICAL SKILLS

- **Languages & Core:** TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
 - **Backend & Architecture:** Node.js, Nest.js, RESTful APIs, Microservices architecture, JWT / RBAC, Asynchronous Messaging / Webhooks
 - **Frontend Engineering:** React.js, Next.js (SSR / SSG / ISR / App Router), TanStack Query, Redux Toolkit, Context API, Recharts, Core Web Vitals optimization
 - **Databases & Cloud / DevOps:** MongoDB (Mongoose), AWS (S3, CloudFront), Playwright (E2E & API testing), Jest, GitLab CI/CD, Git, Vite, Webpack
-

WORK EXPERIENCE

Keyloop | Jan 2025 - Present

Software Engineer

- Architect dynamic, configuration-driven UI modules for Saleshub, an enterprise multi-tenant automotive SaaS platform serving global brands (BMW, VW, Honda).
- Engineered a real-time Financial/Insurance (F&I) calculation engine managing multi-tier tax formulas, rebates, and lender reserves, executing nested workflows with sub-50ms client-side latency.
- Collaborated on API contracts and integrated microservices with asynchronous messaging pipelines (SMS, webhooks) via TanStack Query optimistic updates, eliminating client-server state desynchronization.
- Optimized Core Web Vitals across vehicle catalogs containing 10,000+ listings via route-based dynamic code splitting and selective hydration, maintaining sub-2.5s LCP and sub-150ms INP under heavy loads.
- Built automated end-to-end and API regression suites using Playwright integrated into GitLab CI/CD pipelines, preventing breaking changes across critical checkout flows.

Vongxanh (Blue Circle) | Sep 2023 - Jan 2025

Fullstack Engineer

- Engineered modular RESTful APIs and business logic services using Nest.js and TypeScript, implementing JWT authentication, RBAC, and MongoDB aggregation pipelines across 100+ product categories.
- Designed compound indexing and schema normalization in MongoDB via Mongoose, resolving slow queries and achieving sub-second response times during high-concurrency marathon registrations.
- Architected end-to-end features for Active.vn (luxury e-commerce) and internal CMS dashboards using Next.js (App Router), TanStack Query, and Recharts to visualize real-time analytics for 10,000+ SKUs.
- Standardized GitLab CI/CD pipelines with automated linting, type-checking, and build validation, maintaining zero deployment rollbacks on production branches.

MangoAds | Jan 2022 - Sep 2023

Frontend Developer

- Developed high-traffic, public-facing digital banking portals for tier-1 institutions (Cake by VPBank, Eximbank) using Next.js, React, and TypeScript.
- Architected hybrid rendering strategies (SSR/SSG/ISR) adhering to strict banking security standards, driving Google Lighthouse performance and accessibility scores to 95+.

Keppel Land | Sep 2021 - Dec 2021

Software Developer Intern

- Developed vendor-tracking dashboards and receipt validation workflows for the Reward+ Loyalty CMS (Saigon Centre Mall) using React and TypeScript, supporting 50+ retail tenants.
 - Collaborated in weekly Agile/Scrum sprint cycles, contributing unit tests and active peer pull-request code reviews.
-

EDUCATION

University of Information Technology - VNU-HCM (UIT).

Bachelor of Information Technology

- **GPA:** 3.2/4.0
- **Honors:** Third Prize – UIT Library Management System Competition
- **Activities:** Core Member, UIT Code Club; Technical Volunteer, UIT Open Day Tech Showcase
- **Languages:** English (Professional Working Proficiency – IELTS 6.0), Vietnamese (Native)
